|---|-------------------------------|---------------|
| <p>This article investigates the difficulties that come with implementing electric means of transport into our life. As far as the text is concerned, the main problems are of incorporating these innovations are the dearth of sufficient power and the shortage of certain rare ingredients.</p> <p>It is mentioned that less wealthy countries may not be able to afford funding this process such as nations of Africa. It is said that a number of problems arises with batteries. Despite recent discoveries in this area, batteries still do not possess needed qualities and also have a high production cost. Most businessmen and analysts are certain that new technology will solve all of these challenges.</p> <p>From my perspective, I believe that complete integration of electric means vehicles is not only about advancing our technologies but also establishing such conditions for citizens of different countries, where people would be enticed to purchase said transport. In my opinion, electric cars are very beneficial for humanity however they require a substantial amount of time.</p> <p>All in all, I think that upon the advent of electric means of transport our life will never look the same.</p> | Количество слов: <u>175</u>   |               |
